Internet - Phone - Data

Calix 844 GigaCenters—now available for your Fiber Internet service needs from SECOM, your communications company. GigaCenters are a cost effective solution for a $5.00 lease fee per month.

Q: Why choose a GigaCenter for my home or business?

A: The GigaCenter is a powerful, simple solution. Instead of the customer needing to purchase a router, configure the router, and spend the time maintaining it, SECOM instead offers the GigaCenter as an all-in-one solution: The GigaCenter provides superior Wi-Fi coverage, ease of use, and SECOM will provide maintenance for it for the entire lifetime of your services.

Q: What speeds are achievable with Wi-Fi through a GigaCenter?

A: GigaCenters support a very high standard: 802.11ac. As with all Wi-Fi units, range, interference, your service plan, and what your PC or connected device will support factor in. Simply put, it's incredibly fast and reliable, specifically engineered as one of the best solutions for the services we offer.

Q: Can I plug my PC or other internet device into a GigaCenter?

A: Yes! There are 4 Gigabit-capable Ethernet ports available, and you can plug your networking cables into any of them.

Q: Can I run voice lines through SECOM from a GigaCenter?

A: Yes! There are two ports available for putting phone lines in. If you need more, SECOM can put in the additional hardware to support you in whatever way is needed.
